Index to Volume 121

- Agonist dissociation constant estimation, potential errors caused by desensitization, 221
Amino acid sequence, common, in proteins with membrane attaching ability, is there evidence for?, 293
Alignment of three biological sequences with an efficient traceback procedure, 327
Artery walls, theoretical model to study the effect of convection and leaky junctions on macromolecule transport in, 141
ASBÓTH, B. (see POLGÁR, L.), 323
ASHIDA, H., Stochastic description of the three-state model of the Na channel, 45
ATKINSON, T. (see TAYLOR, M. J.), 293
Automata networks and biological organization, 255
- Barriers, evaporative water loss, a kinetic analysis of, 439
BARTON, K. M. (see DOWSE, H. B.), 173
BENIGNI, R. and GIULIANI, A., A new insight into chemical mutagenesis by multivariate data analysis, 477
BENKEL, B. (see HICKEY, D. A.), 283
BHATT, B. S., Comments on a model of ovum transport (letter), 249
Biological organization, networks of automata and, 255
Biological sequences, three, alignment with an efficient traceback procedure, 327
BLAKE, J. R. (see FULFORD, G. R.), 381
Body size relations can be explained by energy budgets, 269
Body size, sexual dimorphism in; are larger species more dimorphic?, 163
BRODY, S. (see COTÉ, G. G.), 487
- Cancer cell-killing organs during hematogenous metastasis, mechanical aspects of the lungs as, 307
Catalyses by serine and cysteine proteinases, the basic difference resides in charge stabilization in the transition state, 323
Cell division, calculation of rates of in shoot meristems, with reference to the growth tensor, 59
Cells, eukaryotic, irradiated, modelling of DNA sedimentation profiles from, 121
Cellular slime mold, implementation and extension of MacWilliams model for pre-stalk pre-spore regulation in, 22
Charge stabilization in the transition state, the basic difference in catalyses by serine and cysteine proteinases resides in, 323
Chemical, electrical and mechanical work, the connections between particle flow and, 1
Chemical mutagenesis, a new insight into, by multivariate data analysis, 477
Chondrogenesis, limb, on the Newman-Frisch model of, 505
Circadian rhythms in *Drosophila melanogaster*: analysis of period as a function of gene dosage at the *per* (period) locus, 487
Clustering, hexagonal, fungicide induced, of intramembrane particles in the plasmalemma of *Ustilago avenae*; a simple physical model, 351
COHEN, I. R. (see GROSSMAN, Z.), 129
Contraction, muscular, an electrodynamic (moving field) theory of, 233
Control theory, ecosystem, 417
Convection and leaky junctions, a theoretical model to study their effect on macromolecule transport in artery walls, 141

- COTÉ, G. G. and BRODY, S., Circadian rhythms in *Drosophila melanogaster*: analysis of period as a function of gene dosage at the *per* (period) locus, 487
- Cysteine and serine proteinases, catalyses by, the basic difference resides in charge stabilization in the transition state, 323
- DAMSTRA, K. ST J., A kinetic analysis of evaporative water loss barriers, 439
- Desensitization, potential errors in agonist dissociation constant estimation caused by, 221
- Dielectric continuum modelling of the protein-solvent system, and calculation of the long-range electrostatic field of the enzyme phosphoglycerate mutase, 199
- Diffusion-reaction system, role in the initiation of skin organ primordia; the first wave of initiation, 449
- Digesta flow, determination by continuous marker infusion, 105
- DIMITROV, D. S. (see WEISS, L.), 307
- Dimorphism, sexual, in body size: are larger species more dimorphic?, 163
- Diploid sexual population, constancy of mean strategy versus constancy of gene frequencies in (letter), 367
- DNA sedimentation profiles from irradiated eukaryotic cells, modelling of, 121
- DOWSE, H. B., RINGO, J. M. and BARTON, K. M., A model describing the kinetics of mating in *Drosophila*, 173
- Drosophila melanogaster*, analysis of period of circadian rhythms as a function of gene dosage at the *per* (period) locus, 487
- Drosophila*, a model describing the kinetics of mating in, 173
- DUGGLEBY, C. J. (see Taylor, M. J.), 293
- Dynamics, population, lymphocyte, and parasite immunology, 129
- Ecosystem control theory, 417
- Electrical, mechanical and chemical work, the connections between particle flow and, 1
- Electrodynamic (moving field) theory of muscular contraction, 233
- Electrostatic field, long-range, of the enzyme phosphoglycerate mutase, calculation of, and continuum dielectric modelling of the protein-solvent system, 199
- ELFASSI, E., PATARCA, R. and HASELTINE, W. A., Similarities among the pre-S regions of hepatitis B viruses: analogy with retroviral transmembrane proteins, (letter), 371
- Endotherms, an energetic model of daily torpor in, 403
- Energetic model of daily torpor in endotherms, 403
- Energy budgets can explain body size relations, 269
- Enzyme, double site, and squatting: where one regulatory ligand is also a substrate of the reaction, 89
- Enzyme phosphoglycerate mutase, calculation of the long-range electrostatic field of, and continuum dielectric modelling of the protein-solvent system, 199
- Eukaryotic cells, irradiated, modelling of DNA sedimentation profiles from, 121
- Eukaryotic mRNA splicing mechanisms, evolutionary origin of; introns as relict retrotransposons, 283
- Evaporative water loss barriers, a kinetic analysis, 439
- Evolutionary origin of eukaryotic mRNA splicing mechanisms; introns as relict retrotransposons, 283
- Flow, digesta, determination by continuous marker infusion, 105
- Flow, particle, and mechanical, electrical and chemical work, the connections between, 1
- FRANCE, J. and SIDDONS, R. C., Determination of digesta flow by continuous marker infusion, 105
